- Dry chemicals Powder.
- Foam.
- BCF (Where regulations permit).
- Carbon dioxide (CO₂).
- Water spray or fog.

5.2 Special hazards arising from the substrate or mixture

Fire incompatibility ➤ Avoid contamination with oxidizing agents i.e. nitrates, oxidizing acids, chlorine acids, chlorine bleaches, pool chlorine etc. as ignition may results.

5.3 Advice for firefighters

- Fire fighting ➤ Alert Fire Brigade and tell them location and nature of hazard.
➤ Wear full body protective clothing with breathing apparatus.

- Minor spills** ➤ Wear safety glasses.

6.4 Reference to other sections

Personal protective Equipment advice is contained in Section 8 of this SDS.

SECTION 7 HANDLING AND STORAGE

7.1 Precautions for safe handling

- Safe Handling** ➤ The greatest potential for injury caused by molten materials occurs during purging of machinery (moulders, extruders etc.) It is essential that workers in the immediate area of the machinery wear eye and skin protection (such as full face, safety glasses, heat resistant gloves, overalls and safety boots) as protection from thermal burns.

Fire and explosion protection See section 5

7.2 Conditions for safe storage, including any in compatibilities

Suitable container

- Metal or HDPE can or drum
- Packaging as recommended by manufacturer.
- Check all containers are clearly labeled and free from leaks.

Storage incompatibility

Avoid contamination of water, foodstuffs, feed or seed.

CARE : Water in contact with heated material may cause foaming or a steam explosion with possible severe burns from wide scattering of hot material. Resultant overflow of containers may result in fire.

- Avoid reaction with oxidising agents

8.2 Exposure controls

8.2.1 Appropriate engineering controls

For molten materials:

Provide mechanical ventilation; in general such ventilation should be provided at compounding/ converting areas and at fabricating/ filling work stations where the material is heated. Local exhaust ventilation should be used over and in the vicinity of machinery involved in handling the molten material.

Keep dry!!

8.2.2 Personal protection

Eye and face protection

- **For molten materials :** Safety glasses with side shields

- **For molten materials :** Chemical goggles.

Skin protection

See Hand protection below

Hands/feet protection

For molten materials : Wear general protective gloves, e.g. light weight rubber gloves.

Body protection

See Other protection below

Other protection

- When handling hot or molten liquids, wear trousers or overalls outside of boots, to avoid spills entering boots. Usually handled as molten liquid which requires worker thermal protection and increases hazard of vapour exposure.

CAUTION: Vapours may be irritating.

No special equipment needed when handling small quantities.

Thermal hazards

Not Available

Respiratory protection

Respiratory protection is not required. Where protection from nuisance le (EN 143) dust masks. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU) or national equivalent.

8.2.3. Environmental exposure controls

Do not let product enter drains.
